The subscription price per volume is Dfl. 257.00 (approx. $ 95.00), postage Dfl. 22.00 (approx. $ 8.00).
Subscriptions should be sent to the publisher, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, Amsterdam, The Netherlands, or to any subscription agent or bookseller. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.

Elsevier Science Publishers B.V.: All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior permission of the publisher, Elsevier Science Publishers B.V. (North-Holland Physics Publishing Division), P.O. Box 103, 1000 AC Amsterdam, The Netherlands.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the USA. — This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $ 2.25, also payable through the Center. (N.B. For review journals this fee is $ 0.20 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Instructions to authors

Contributions should be sent in *triplicate* to the editor. Contributors are reminded that, once their contribution has been accepted for publication, *all further correspondence should not be sent to the editor, but directly to the publisher. (Editorial Department, North-Holland Publishing Company, P.O. Box 103, 1000 AC Amsterdam, The Netherlands).* Manuscripts should be written in English, French or German. Each manuscript should contain an abstract in English. Manuscripts should be typewritten originals (plus two copies) with a wide margin and ample space between the lines. Contributions are strictly limited to 6 printed pages. As all proofreading will be done by the publishers' staff and no proofs will be sent to the author, the presentation of the manuscript should be very clear. Special care should be taken of those symbols which might easily cause confusion (e.g. o, 0, O; κ, k, K; X, x, $\times$, χ; z, Z; $\propto$, α; φ, ϕ, $\emptyset$; t, τ, T, Γ; $\langle$, $<$, $\rangle$, $>$; w, ω; p, ρ, etc). All Greek letters and unusual symbols should be identified in the margin the first time they occur in the text. No manuscripts will be returned unless by special request of the author. All references must be numbered, put at the end of the paper, and should contain the names and initials of all authors. References should not contain footnotes. Figures should be sharp glossy prints of about manuscript size, or, preferably, original drawings. They should be lettered by using a lettering guide (stencil) or stripletter (e.g., letraset) in such a way that they can be reduced to one-column width (7½ cm). All figures should have captions.

For purposes of compiling a subject index authors are requested to index their manuscripts according to the following classification list:

1. *Propagation and transmission in homogeneous media* (interference, diffraction, coherence, polarization, geometrical optics, optical measurement techniques).
2. *Propagation and transmission in inhomogeneous media* (coherence in random turbulent media, scintillation, scattering from haze, fog, dust, etc., atmospheric optics).
3. *Optical information, image formation and analysis* (Fourier transform optics, modulation and optical transfer functions, optical storage and retrieval, holography, pattern recognition, image processing and restoration, speckle).
4. *Optical communications* (optical waveguides, fiber optics).
5. *Atomic and molecular physics* (atomic and molecular spectra and interactions with photons, atomic and molecular collision processes and interactions, use of optical techniques for determining other properties).
6. *Condensed matter* (spectroscopy, optical properties of materials, use of optical techniques for determining other properties).
7. *Plasmas.*
8. *Lasers* (including laser beam interactions and applications).
9. *Nonlinear optics* (stimulated Raman, photon echoes, parametric oscillations and other interactions of radiation with matter, harmonic generation, beam trapping, self-induced transparency and related effects).

n the absence of such indications by the author, the classification will be done by the Editor.

ENRICO FERMI INTERNATIONAL SUMMER SCHOOL OF PHYSICS, Vol. 74

Development in High Power Lasers and Their Applications

Proceedings of the International School of Physics "Enrico Fermi", Course LXXIV, Varenna, Italy, 10-22 July, 1978, Vol. 74

edited by C. PELLEGRINI, *C.N.E.N. Centro di Frascati, Rome, Italy*

1981 xii + 480 pages Price: US $89.25/Dfl. 210.00 ISBN 0-444-85459-2

This book presents a review of the basic principles and recent developments of: high peak power lasers and their applications to laser fusion; high average tunable lasers and their applications to photochemistry, isotope separation and related fields.

A very recent and very promising new laser system, the free-electron laser, is also extensively discussed. Both our present-day knowledge and the possible future developments of this new laser, which might find new and interesting applications because of its high power and its possibility to operate at all wavelengths from the far infra-red to the ultraviolet, are dealt with.

The lectures presented at this Course start from the basic elements of high power laser physics and technology and the fundamental principles of the fields in which they are applied and then continue to review and discuss the most recent work. Some seminars given at the School and discussing more specialized topics are also included in this work.

CONTENTS: Preface *(C. Pellegrini).* Introduction to High-Energy Lasers *(F. A. Hopf).* Laser-Fusion and Laser-Plasma Interactions *(R. Balescu).* High Power, Short Pulse CO_2 Laser Systems for Inertial Confinement Fusion *(S. Singer et al.).* The High Power Iodine Laser *(E. E. Fill).* High Power Tunable Lasers and Their Applications to Photochemistry and Isotope Separation *(K. L. Kompa).* Photophysical and Photochemical Properties of Gaseous UF_6 *(S. De Silvestri, O. Svelto and F. Zaraga).* High Power 16-Micrometer Lasers for Uranium Isotope Separation *(S. Martellucci and S. Solimeno).* High Power Chemical Lasers *(S. Solimeno and S. Martellucci).* Single Particle Theory of the Free Electron Laser *(S. Stenholm).* Coherent Dynamics of the Free-Electron Laser *(G. T. Moore et al.).* The Free-Electron Laser: The Storage Ring Operation.

Subscription Scheme

This book, volume 74 in the renowned **Enrico Fermi Series,** is available under a subscription scheme offering a special discount of 15% on the list price.
